CLOUD COMPUTING

DEFINTION

Internet-based
computing

store data and
use applications
online.

CHARACTERISTICS

on demand
service

Resource pooling

Rapid scaling

measured use

Security risk

Internet dependency

Optimo

BENEFITS

cost saving

Flexisity

scalasility

Easy access

Evolution Cloud

Hardware Evolution

Internet software

Distributed system

mainframe

Personal PCs

virtual servers

web browsers

web applications

Interfaces

Resource sharing

multiple computing

Distributed

Cloud computing

service diversity

Ians - Pros - Jans

CLOUD SERVICE MODELS

IaaS

Infrastructure as a service

PROVIDER

- Server
- Storage
- Networking

USER

- OS and apps
- Data

PaaS

Platform as a service

PROVIDER

- Infrastructure
- Os and hosting
- Development

USER

- Application development
- Application data

SaaS

Software as a service

PROVIDER

- Complete app
- Maintenance
- Update

USER

- Use software
- Manage own data

CLOUD COMPUTING ENABLED

TECHNOLOGIES

VIRTUALIZATION

(Provides virtual resource

Virtual machine

virtual Storage

Virtual network

BENEFITS

Resources Sharing

Cost reduction

WEB SERVICE

Connect > application over network

API >

HTTP / HTTPS

data exchange

BENEFITS

Easy integration

Communication

Interoperability.
